

## Arrival/Departure Summary Panel Display

**mod. TF05-00** (23" Adj. bracket) **mod. TF07-00** (23" Fix bracket)  
**mod. TF06-00** (32" Adj. bracket) **mod. TF09-00** (32" Fix bracket)

Devices made of LCD-TFT technology, are part of a line of devices for displaying information to travelers in public transportation applications.

Because of their structure and their characteristics, these types of devices may be intended for any use, either type of information (Summary of schedule) and presentation (advertising).

Despite the display must meet requirements for aesthetic needs, being planned for installation in indoor, the monitor has features of durability and resistance to vandalism thanks to the steel frame and the protective glass with a high degree of resistance.

Monitor LCD-TFT mod. TF05-00

The optical component of the system is an LCD-TFT 23 "/ 32", 16:9, WXGA Color.

The devices, thanks to the characteristics of the operating system and application software on board, are able to view any information screen so to allow the use of these in many different areas (web applications, etc..).
